

ARNOLD SCHMIDT - MONDFLEISCH

born in Styria, now lives in Vienna after working for years in Germany and the US. His educational background is in the social and natural sciences. Furthermore, he is an enthusiastic self-developer.

His work is an invitation to discover and reinvent oneself again and again - he wants to show that reality materializes, through the way we look at it. How it opens up to us through our values, dreams, hopes and views, that unobserved it remains just a wave in the sea of possibilities.

He wants to show how strongly the world views in our heads are shaped by language games of philosophy and natural sciences. And that the world remains indifferent to the pictures we paint of it. And yet, the structures and relationships between the images, seem to carry a touch of eternity and beauty.

He sees himself as an interdisciplinary worker, a mediator between art and science.
